

*Kano Panel Sample:*

Kano Phase 2 panel data collection was conducted among females aged 15-49 at the time of the Phase 2 survey who were interviewed at the baseline survey between December 2019 and January 2020 and consented to follow-up (96.3% of baseline population). Of the 1085 eligible respondents, 7.8% were not reached for follow-up. Of those reached, 1001 (92.3%) completed the survey, for a response rate of 99.7% among contacted women. The flowchart below provides the details on the loss to follow-up and panel women sample in Kano.
