

Kongo Central Panel Sample

Kongo Central Phase 2 panel data was conducted among females aged 15-49 at the time of the Phase 2 survey who were interviewed at the baseline survey between December 2019 and February 2020 and consented to follow-up (96.5% of baseline population). Of the 1902 eligible respondents, 18.1% were not reached for follow-up. Of those reached, 1534 (80.7%) completed the survey, for a response rate of 98.5% among contacted women. The flowchart below provides the details on the loss to follow-up and panel women sample in Kongo Central.
