<p>consent Hello. My name is _____ and I am working for Center for Research, Evaluation Resources, and Development and the Centre for Advance Medical Research. We are conducting a local survey that asks women about various reproductive health issues, including knowledge, attitudes, and use of contraception and abortion. Some of these questions, in particular the abortion questions, have been added expressly for research purposes. We would very much appreciate your participation in this survey. This information will help us inform the government to better plan health services. The survey usually takes between 30 and 40 minutes to complete. Whatever information you provide will be kept strictly confidential and only fully de-identified data will be used when conducting analyses, presenting results, or sharing data. Participation in this survey, both the standard survey and the research questions, is entirely voluntary. If we should come to any question you don't want to answer, just let me know and I will go on to the next question. You can choose not to participate at all or you can stop the interview at any time. However, we hope that you will participate in this survey since your views are important. If you have any questions about the study and your right as a research participant, you may ask me now or you may also contact Dr. Elizabeth Omoluobi at Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +2348033816486. At this time, do you want to ask me anything about the survey? May I begin the interview now?</p>	<p>note</p>
