INFORMED CONSENT

Find the woman between the ages of 15-49 associated with this Female Questionnaire. The interview must have auditory privacy. Administer the consent procedures.

Hello. My name is ......................... and I work for the School of Public Health in Kinshasa in collaboration with the Ministry of Health. We are currently conducting a survey in Kinshasa and in Kongo Central on several issues related to women’s reproductive health and safety. We would very much appreciate if you joined this study. The information we collect will help inform the government to better plan health services. The interview should last about 1 hour, although the survey time for participants has
ranged from 45 minutes to 1 hour and 45 minutes. Any information you provide will be strictly confidential and will not be shared with anyone outside our team members.

Participation in this study is voluntary, and if there is any question you do not want to answer, just let me know and I will move on to the next one. You may also interrupt the interview at any time. However, we hope that you will agree to participate in this survey as your point of view is important.

Our team is collecting information on family planning, including contraception and abortion, in the Democratic Republic of Congo. We would like to ask you a few questions about yourself, as well as about activities related to family planning. Your information may be used for family planning activities and services in the Democratic Republic of Congo. The data collected will also be analyzed by researchers, but your name will be removed from all analyses, so your information remains anonymous.

This study will be carried out over a four-year period (2019-2022). Once you are included in the survey, we will visit you again after one year every year until the end of the study to interview you if you are still available to see us. As I mentioned earlier, each time we come back, you are under no obligation to see us, but our hope is that you will always be available to see us. This study is for public health surveillance. Additionally, there are two modules for research purposes. You have the option to decline to participate in those two modules. You may refuse to answer any question as many times as you want or decide to end the interview at any time. Do you have any questions about this survey?

B. Researchers Contact Information Take all the time you need to make your decision to participate or not in this study. We would be happy to answer any questions you may have regarding this research study. If you have additional questions, would like to voice a concern regarding this research, or if you have a research-related issue, you may contact the country coordinator of this study. I will also give you a copy of this form with the contact information of the study coordinator, whom you may contact directly for any questions regarding this study.

Pierre Z Akilimali, Principal Investigator, PMA DRC, Mobile phone: XXXXXXXXXX E-mail: pierretulanefp@gmail.com

C. Study Administration and Leadership Contact Information If you would like to talk about your rights as a research participant, discuss an issue, share doubts, ask questions, obtain information, or suggest the help of an informed individual who is not affiliated with this specific research, please contact the Institutional Review Board (IRB) at Johns Hopkins University at: jhsph.irboffice@jhu.edu.

You may also contact the Ethics Committee of the Kinshasa School of Public Health: Prof. Bongopasi at: 0999952341.

Before I proceed, do you have any questions regarding this survey?

008a. Read the verbal consent text. Then, ask: May I begin the interview now?

- Yes
- No

**Section 4 – Sexual Activity**

**CHECK FOR THE PRESENCE OF OTHERS. BEFORE CONTINUING, MAKE EVERY EFFORT TO ENSURE PRIVACY.**

Now I would like to ask some questions about sexual activity in order to gain a better understanding of some important life issues. Let me assure you again that your answers are completely confidential and will not be told to anyone. If we should come to any question that you don’t want to answer, just let me know and we will go to the next question.

### 401. How old were you when you first had sexual intercourse?

Current age: ${age}

Number of live births: ${birth_events}

The respondent is pregnant

Enter the age in years.

Enter -77 if she has never had sex. Enter -99 for no response. Enter -88 for do not know.

WARNING: you entered -77, but the respondent is currently pregnant or has given birth before. Go back and fix.

The timing of the number of births should agree with 401
**WARNING:** the respondent gavebirth \( \# \) times, but first had sex at the age of \( \# \) years old, only \( \# \) years ago. Is that correct?  
*The timing of the number of births should agree with 401.*

You entered that the respondent was \( \# \) years old the first time she had sexual intercourse. Is that what she said?  
*Go back and change 401 if it is not correct.*

You entered that the respondent's age at first sex was \( \# \). Previously the respondent said she has given birth at an earlier age: \( \# \). Is that correct?  
*Go back and change “age at first sex” if it is not correct*

402. Looking back to the first time you had sexual intercourse, do you think you would have preferred to: have waited longer before having sex with anyone, not have waited so long, or was it the right time?  

403. The first time you had sexual intercourse, would you say you and your partner were both equally willing to have sexual intercourse was one of you more willing than the other?  

404. Which of these applied to you at the first time you had sex?  
*Read each option aloud and select if yes.*  

405. Did you and your partner want to avoid a pregnancy the first time you had sexual intercourse?  

406. Did you or your partner do something or use any method to delay or avoid getting pregnant?  

407. When was the last time you had sexual intercourse?  

407. Enter \( \# \).  

If today, enter zero days only, not zero weeks/months/years.
**Must agree with the age of first sexual intercourse and the pregnancy status.**

The respondent is pregnant. The time since last sex must not be earlier than one month prior to the start of pregnancy. If number of months pregnant is unknown, then the time since last sex must be less than 11 months.

Months pregnant: \(\text{months\_pregnant}\) Last time sex units: \(\text{last\_time\_sex}\) Last time sex value: \(\text{last\_time\_sex\_value}\)

The respondent cannot enter a time since last sex that would be before her age at first sex.

Age at first sex: \(\text{age\_at\_first\_sex}\) Current age: \(\text{age}\) Last time sex units: \(\text{last\_time\_sex}\) Last time sex value: \(\text{last\_time\_sex\_value}\)

### Section 6.2 – Abortion

**CHECK FOR THE PRESENCE OF OTHERS. BEFORE CONTINUING, MAKE EVERY EFFORT TO ENSURE PRIVACY.**

Sometimes women are worried they are pregnant or get pregnant when they do not want to be and they do something to end the pregnancy. The next series of questions are about things your friend may have done to end a pregnancy. This is a common experience in DRC and we simply want to better understand what women do in this situation. I want to remind you that this survey is completely confidential and anonymous and we do not know who your friend is. If we should come to any question that you don't want to answer, just let me know and I will skip to the next question.

#### ABT_11. Has she ever done something or tried to do something to end a pregnancy when she was pregnant or worried she was pregnant?

*Probe to confirm whether the pregnancy removal was successful. If not, select “no”.*

- [ ] Yes, I am certain
- [ ] Yes, I think so
- [ ] No
- [ ] Do not know
- [ ] No response

#### ABT_12. In what year did this happen?

*If indicates happened more than once, specify most recent time. Enter 2030 for “Do not know” or “No response”.*
