Hello, my name is {your_name} and I work for the Ecole Nationale Supérieure de Statistique et d'Economie Appliquée (ENSEA) in Abidjan. We are conducting a study in the field of health, specifically on family planning in Côte d'Ivoire. To this end, I am going to read you this form in order to explain the main objective of the study and to give you additional information in order to solicit your participation in this study. Presentation and purpose of the study	{available} = 'yes' and {pl_woman_auto} = '1'

In collaboration with the Ministry of Health and Public Hygiene and Universal Health Coverage of Côte d'Ivoire and the Johns Hopkins University School of Public and Reproductive Health in the United States, the Ecole Nationale Supérieure de la Statistique et d'Economie Appliquée (ENSEA) is conducting a study called PMA (Performance Monitoring for Action).

The main objective of this study is to implement a follow-up system for performance in the area of family planning and women's reproductive health among the population and health facilities in Côte d'Ivoire. In addition, the information we collect will be used to inform social development programs in Côte d'Ivoire.

Why are you being asked to participate?

We are asking you to participate in the study because you participated in a survey we conducted last year and indicated that you would be willing to participate in a follow-up survey. Although you agreed at the time to be contacted again for future surveys, you still have the right to decide not to participate at any time. Nonetheless, we would very much appreciate it if you were part of this survey, as the information we collect will help inform the government to better plan health services. Any information you give us will be kept strictly confidential and will not be shown to anyone other than our team members.

Participation in this survey is voluntary, and if there is a question you do not wish to answer, please let me know and I will move on to the next one; you may also stop the interview at any time. However, we hope you will agree to participate in this survey because your views are important. Our interview should last approximately 45 minutes to 1 hour and 45 minutes.

We also want to remind you that there is no direct benefit to you for participating in the study. You will not be compensated for completing this survey. But as a thank you, a hygiene kit (consisting of soap and washing powder) will be offered to your household as compensation for the time your household members spent answering our various questionnaires.

Data privacy protection Data will be collected on smartphones. All data will be sent electronically to the PMA study cloud server. The use and sharing of the information will be subject to strict precautionary principles to ensure its security and confidentiality. Once collection is complete, identifying information will be deleted from the database.

Before continuing, do you have any questions about this survey?

Contact person for additional information or concerns If you have any questions or concerns about this study, you can contact the National Principal Investigator of the study, Dr. Rosine Mosso-BOMISSO in Abidjan at (225) 27 22 44 08 42 / (225) 05 06 57 38 96. If necessary, you can also contact the National Ethics Committee in Abidjan, which has given its approval for the study, at (225) 27 22 00 58 29.
