<p>Hello. My name is and I work for the Institut Supérieur des Sciences de la Population (ISSP) at Joseph KI-ZERBO University. I am now going to read you a statement explaining the survey we are conducting.</p> <p>Information</p> <p>The Institut Supérieur des Sciences de la Population (ISSP) of Joseph KI-ZERBO University, in collaboration with the Burkina Faso Ministry of Health and the Johns Hopkins University School of Public and Reproductive Health in the United States, is conducting a survey called PMA (Performance Monitoring for Action). The aim of this survey is to implement a system for monitoring performance in the field of family planning and health in general among the population and health facilities in Burkina Faso. The information we gather will also be used to conduct research and inform programmatic orientations in the field of family planning in Burkina Faso.</p> <p>Consent</p> <p>We are asking you to participate in the study because you took part in a survey we conducted last year and indicated that you would be willing to take part in a follow-up survey. Although you agreed at the time to be recontacted for future surveys, you still have the right to decide not to participate at any time. Nevertheless, we would very much appreciate it if you would take part in this survey, as the information we collect will help to inform the government in order to better plan health services. All the information you give us will be kept strictly confidential and will not be shown to anyone other than members of our team.</p> <p>Participation in this survey is voluntary, and if there is a question you do not wish to answer, please let me know and I will move on to the next one; or you can stop the interview at any time. There is no direct benefit to you in taking part in the survey. You will not be remunerated for completing this questionnaire. However, we hope you will agree to take part in this survey as your views are important. Our interview should last about 1 hour. At the end of the survey a token gift of a packet of sugar and two bars of soap will be given to your household as compensation for the time members of your household have spent answering our various questionnaires.</p> <p>The questions will cover family planning, women's empowerment, and health service delivery. In addition, there are 10 questions about knowledge and attitudes about female circumcision that will be used for public health research purposes. You have been selected for this research study because you have been selected to take part in the PMA surveillance project. Participants do not have to respond to these questions as part of the PMA survey. These questions will be used for public health research purposes.</p> <p>For the questions on information related to female circumcision, we will share this information with UNFPA (a United Nations</p>	<p>\${available} = 'yes' and \${pl_woman}</p>
