<p>As a reminder this is a study about maternal and newborn health. We will be visiting you at four time points: now, 6 weeks postpartum, 6 months postpartum and 1 year postpartum. Do you still consent to be enrolled in this study?</p> <p>For women not yet enrolled, ask: Based on your answers to the previous questions, you are qualified to participate in our study. The survey is about maternal and neonatal health and is being conducted with the support of the Ministry of Health. The information you give us will help to inform the government to better plan health services. We would very much appreciate your participation in this survey, but whether or not you choose to participate is completely up to you. There is no penalty for not participating.</p> <p>The survey will take place over three study visits. These visits will take place at 6 weeks, 6 months, and one year after the delivery of your baby. We will return at each of the three visits and ask you questions about your health and the health of your baby. At each visit, we will ask similar questions, because we are trying to learn about how the health of you and your baby changes over time. Some of the questions will have to do with your health during and after pregnancy and what care you received and some of the questions will be about your baby's health and what care they received. Some of the questions may be sensitive but you do not have to answer any questions that you do not feel comfortable answering.</p> <p>The first visit will take approximately 45 to 60 minutes to complete. The second and third interview will take approximately 20 to 30 minutes to complete.</p> <p>There are minimal or no perceived risks or harm for participating in this survey. Keep in mind that you do not have to answer all of the questions and you may stop at any time.</p>	

<p>Whatever information you provide will be kept strictly confidential and will not be shown to anyone other than members of our survey team. All research projects carry some risk that information about you may become known to people outside of the study. To protect against this, the phone and any applications with PMA Ethiopia data are password protected.</p> <p>If you agree to participate today, we will give you an identification card with a bar code scan. This card will only be used to identify you for this study. At the last in-person visit, we will take the card away and destroy it.</p> <p>There is no direct benefit to you from being in the study. You will receive 25 birr in phone credit at each visit as a thank you for your time. If you agree to participate today, we will assume that you agree to each of the three study visits but you have the right to stop participation in the study at any time.</p> <p>If you have any questions related to this study you may contact Drs. Solomon Shiferaw ( 251-911-406845) or Assefa Seme (251-911-228193). For any ethical issues, please call Dr. Solomon Abay, the IRB chairperson (011-251 941 222169) at the Addis Ababa University, College of Health Sciences. (Panel Only)</p>
