Hello. My name is ${your_name} and I work for the National Institute of Statistics (NIS) in collaboration with the Ministry of Public Health to help the government and communities learn more about health services. Your facility was randomly selected to participate in this study. We would like to ask you questions about family planning and reproductive health services. Information about your facility may be used by health organizations to plan service improvements or for future studies. Researchers will also use the data collected from your facility for analytical purposes. However, the location and name of your facility will be masked with a randomly generated identifier that only you and the project team will know, and any information or reports that include your facility will present your information only in aggregate or by masking your facility's name and location so that it cannot be identified. We would like to come back regularly to update your facility's data or to survey a sample of your customers about the services they received. These bi-annual updates will be short and include fewer questions. The survey will be presented and individual consent will be obtained from each respondent prior to interviewing. We ask for your help in ensuring the accuracy of the information collected. If someone is better suited to answer some of our questions, we would be very grateful if you would introduce us to that person. There is no direct benefit to you for participating in this survey. However, there is a benefit to the government and its partners who will use the information to	`${available} = 'yes'`
