<p>Hello. My name is _____ and I am working for the Center for Research, Evaluation Resources, and Development. We are conducting a local survey about various health issues. Your facility has been selected to participate. We would very much appreciate your participation in this survey. This information will help us inform the government to better plan health services. Whatever information you provide will be kept strictly confidential and will not be shown to anyone other than members of our survey team.</p> <p>Participation in this survey is voluntary, and if we should come to any question you don't want to answer, just let me know and I will go on to the next question; or you can stop the interview at any time. However, we hope that you will participate in this survey since your views are important.</p> <p>I am going to ask you questions about family planning and other services that are being provided in this facility. We would be glad to be directed to any other facility staff to answer any questions that you may fill that he/she has more information.</p> <p>If you have any questions about the study and your right as a research participant, you may ask me now or you may also contact Dr. Musa Sani Zakirai at</p>	<div style="text-align: right;"> \${available} = 'yes' and \${level1} = 'kano' </div>

Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +XXXXXXXXX.
At this time, do you want to ask me anything about the survey?

Hello, my name is _____. I am one of the interviewers for the PMA/Lagos survey that is supported by the Centre for Research Evaluation Resources and Development. The survey will collect information from selected health facilities. Your facility is one of those selected to participate in the survey.

As part of the survey, I would like to ask you some questions about your health facility. There is little or no risk to either you or your facility for participating in this survey. Some of the questions in the survey ask about services your facility offers. There are no consequences for not participating. There are no direct benefits to you for participating in this survey. You will not be paid for being in this survey and you are free to stop the interview at anytime.

I want to assure you that all of your answers will be kept strictly confidential. I will not keep a record of your name or address. You have the right to stop the interview at any time, or to skip any questions that you don't want to answer. There are no 'Right' or 'Wrong' answers.

Your participation is completely voluntary but your experiences could be very helpful to others.

Would it be alright for me to ask you some questions? The questions should take only about 45 minutes to complete.

There are a few things you should know about this survey: 1. You get to decide if you want to be in the survey and whatever you decide is OK. 2. It is also OK to say 'Yes' and change your mind later. You can stop being in the survey at any time. If you want to stop, please tell me and I will not be upset. 3. You can say 'Yes' to the study and as I ask you questions, you can say 'No' to any question that you do not want to answer. 4. Your answers will be kept strictly confidential. That means that your answers will just be between you and me and will never be connected to your name or any other personal information. 5. Sometimes you might not know the answer to a question or might not want to answer a question. I would rather you say you don't know or that you don't want to answer a question than tell me a story that isn't true. You can also direct me to someone else in the facility that may know the answer. 6. We will document your address so we can visit your facility at least one time a year for the 4 year duration of this study.

Do you have any questions?

`${available} = 'yes' and ${level1} = 'lagos'`

For any further concerns about your rights in this survey or the procedures you may contact Dr. Funmilola Olofinjana at XXXXXXXXXX who is prepared to address your concerns. Please feel free to write down this information for future reference.
